

Make your next walk a safari. Look for animals, bugs, plants, and other natural things. Then stop and check them out. Use a magnifying glass. Listen to their sounds, too.

Be a nature photographer. Grab a camera or smartphone and head outside to photograph the world's beauty and strangeness. Share your photos on social media or make a blog.

Host your next birthday party at a park or nature center. Play games like I Spy and hide-and-seek, or have a scavenger hunt. See if you can have a naturalist lead a nature hike.
